SUMMARY

Results-driven **Lead Mobile Application Developer** over **7 years of experience** in mobile apps development and **QA automation**. Proficient in **Flutter, Android (Java/Kotlin), and iOS (Swift, Objective-C)** with expertise in **Object-Oriented Programming (OOP)** and **mobile architecture**(source control management). Strong analytical and **problem-solving skills** and debugging, with experience in **cloud computing (AWS, Azure, GCP)**, **CI/CD pipelines**, and test automation using **WebDriverIO (TypeScript)**. Adept at multitasking, managing time effectively, and delivering high-quality solutions.

- Strong expertise in **full software development life cycle, state management (RiverPod, Bloc, Provider, GetX)** as efficient session management using **Clean Architecture** , **CI/CD pipelines**, and integrating **third-party services**(Twilio, Agora, Zoom, Helpshift, Payment Gateways, Firebase, OneSignal etc...).
- Skilled in team collaboration and on-site development, contributing to high-quality software delivery.
- Skilled in **test automation**, including **UI testing, functional testing, and API testing** using **WebDriverIO** and **Cucumber**.
- Experienced in **Agile/Scrum and SAFE methodologies**, collaborating with cross-functional teams (developers, QA engineers, product managers, designers) to ensure high-quality software delivery.
- Experience with asynchronous programming frameworks like **Kotlin Coroutines** and reactive programming libraries like **Kotlin Flow**.
- Passionate about optimizing performance, enhancing user experience, and leveraging data-driven insights using tools like **Amplitude, Logstash, Sentry, Alice and Google & Firebase Analytics**.
- Strong leadership and project management experience, including mentoring junior developers and successfully leading mobile development for a leading U.S. healthcare company and an Abu Dhabi-based e-commerce platform.
- Support onboarding of new developers through hands-on guidance and process training
- Facilitate **technical discussions** and design reviews to align development with architectural goals
- Proactively learning **React Native** through self-study, building personal projects, and exploring best practices.

SKILLS

Software Development:

- **Mobile Development:** Flutter (Dart), Android (Java, Kotlin), iOS Development (Swift, Objective-C), React Native
- **IDE:** Visual studio, Android Studio, Xcode, Ionic, IntelliJ
- **State Management:** RiverPod, Bloc, Provider, GetX
- **Architecture & Design Patterns:** MVVM, MVP, MVC, Clean Architecture, Domain-Driven Design (DDD), SOLID Principles
- **Android Jetpack Components:** ViewModel, LiveData, Room, WorkManager, Navigation Component
- **Dependency Injection:** Dagger, Hilt
- **Backend & Web Services:** RESTful APIs, GraphQL, OAuth2, Retrofit, RxJava, Firebase, JSON Web Tokens
- **CI/CD & Cloud Services:** Git, Azure DevOps, CodeMagic, Jenkins, Terraform, AWS Cognito, Google Firebase Platform

- **Cloud Computing:** AWS (EC2, S3, Lambda, RDS, CloudWatch, SNS, SQS), Azure, GCP

Automation & QA: Test Automation: WebDriverIO

- **Programming & Scripting:** TypeScript, JavaScript
- **Test Frameworks & Tools:** Cucumber, JUnit, Mockito, Espresso, Ktor, Swagger, Postman
- **Cloud & DevOps for QA:** Azure DevOps, CI/CD integration for automation
- **Database Testing:** SQL, MySQL, DynamoDB, Redshift, NoSQL db

Tooling & Analytics:

- **Code Version Control Systems & Collaboration:** GitHub, Azure DevOps, Jira, Confluence, SVN
- **Monitoring & Analytics:** Logstash, Amplitude, Google Analytics, Firebase Analytics, Alice, Sentry
- **Design & Prototyping:** Figma

PROFESSIONAL EXPERIENCE

Apexon | Mobile App Developer | August 2025 – Present | Houston, Tx

- Maintain and enhance a complex government assistance application using Clean Architecture, modular code structure, and fully testable components.
- Implement and manage CI/CD pipelines (GitHub Actions) to ensure efficient builds, automated testing, and seamless deployment.
- Automated iOS build generation and TestFlight deployment using xcrun, improving release efficiency and reducing manual upload effort.
- Integrate refactored code, modern UI/UX enhancements, essential third-party plugins, and extensive automated tests (unit, widget, and integration).
- Work as an active member of a SCRUM team, contributing to the end-to-end migration of an existing application to Flutter.
- Collaborate closely with the backend team to improve existing API integrations and design/implement new API endpoints, ensuring smooth data flow with consistent error handling.
- Implement GoRouter for scalable navigation, Feature hooks_riverpod for robust, maintainable state management and flutter_hooks to simplify widget lifecycle management and reduce boilerplate..
- Continuously improve the codebase, features, and architecture—successfully delivering a high-quality, modern, and future-ready application that exceeds user and client expectations.
- Implement Firebase App Distribution to automatically share Android builds with internal testers for rapid feedback and validation.
- Developed and Integrated an AI-powered virtual assistant using Flutter that resulted in a 15% reduction in user-reported support queries by providing instant, automated answers to frequently asked questions.

LumiRx | Lead Flutter Developer JS Native Mobile Engineer | April 2025 – August 2025 | Houston, Tx

- Led the development and maintained the **Lumi Rx mobile application** using **Flutter** for cross-platform compatibility and a consistent UI/UX across Android and iOS.
- **Mentor junior and mid-level developers**, guiding them on best practices, design patterns, and architecture decisions.

- Encourage a culture of continuous learning and knowledge sharing within the development team
- Pair program with developers to resolve complex issues and support skill development
- Implemented **NFC (Near Field Communication)** support in **Flutter** via **platform channels**, allowing secure, contactless data exchange for prescription validation and medical device check-ins.
- Built native NFC functionality for:
- **Android Instant App**: Integrated NFC tag reading (**NfcAdapter**, **NdefMessage**) into lightweight Instant App modules, enabling frictionless patient onboarding without full app installation.
- **iOS App Clip**: Leveraged **Core NFC** within App Clips to allow fast, secure NFC interactions without requiring the full app, aligned with iOS design and privacy guidelines.
- Experience working with design patterns(MVC, MVVM)
- Designed reusable, platform-agnostic NFC logic in Flutter, and bridged native Android/iOS code to expose key NFC operations using Flutter's platform channel architecture.
- Implemented **parental guidance and control features** across the entire application, including role-based access, permission gating, and secure authentication workflows for parent/child accounts.
- Integrated RESTful APIs and handled secure authentication, ensuring robust communication with backend services.
- Optimized app performance and responsiveness through efficient widget structuring and asynchronous data handling.
- Implemented **deep linking** using **uni_links**, enabling smooth navigation via **Universal Links (iOS)** and **App Links (Android)** to specific app screens from external sources like emails and web pages.
- Integrated **OneSignal** for cross-platform **push notifications**, including support for in-app notification handling.

Cloud IQ Technologies | Senior Flutter Developer | May 2023 – March 2025 | Houston,Tx

- Led the design and development of **MyVCA** mobile application, implementing Flutter's modern UI frameworks with **RiverPod and Bloc**, and used version control with **Azure DevOps**.
- Led and mentored a team of junior developers, providing technical guidance on Flutter, Dart, and mobile app development best practices.
- Conduct regular **code reviews** to ensure code quality, maintainability, and adherence to coding standards
- Provide **constructive feedback** during code reviews to help team members improve their coding practices
- Establish and enforce **coding guidelines**, helping the team write clean, consistent, and efficient code
- Conducted code reviews, improving code quality and enforcing best practices.
- Experience in BlocBuilder for reactive UI updates and Clean Architecture principles for scalable architecture.
- Built real-time video calling features using **Twilio Programmable Video**.
- Developed **deep linking and Appsflyer** integration for seamless user navigation and marketing attribution.
- Integrated **Helpshift SDK** for in-app customer support, enabling smooth ticket management.
- Enhanced application **performance tuning and analytics tracking** using **Amplitude and Logstash**.
- Published and optimized **Google Play Store & Apple App Store** listings, improving app ratings.
- Implement and manage CI/CD pipelines (Azure Devops) to ensure efficient builds, automated testing, and seamless deployment.

- Integrate Fastlane to automate build generation, code signing, and publishing workflows for both Google Play Console and Apple App Store.
- Experience handling remote data, verifying responses, and optimizing API request flows via REST and JSON.
- implemented modern authorization mechanisms using **JSON Web Tokens**
- Implemented **Accessibility** feature for the application
- Integrated **Flutter Call Kit** into Flutter applications to provide native call handling capabilities on both iOS and Android platforms.
- Designed and integrated **chat system** with support for attachments of video(**AVPlayerLayer in IOS**), images(**image optimization**), **PDFs**.
- Integrated **social media login** functionality, app signing (e.g., Facebook, Google, Apple) into flutter applications to provide users with seamless authentication experiences.
- Utilized third-party authentication libraries such as **Firebase Authentication** or **OAuth** to implement social media login features securely and efficiently.
- Integrated **Firebase and OneSignal** for push notifications, enhancing user engagement and retention.
- Integrated the application with a responsive app, ensuring it adapts to different screen sizes
- Implemented error handling and callback mechanisms to ensure smooth authentication processes across different devices and network conditions.
- Automated **GraphQL** API testing by validating queries and mutations, optimizing data-fetching mechanisms, and ensuring efficient **API** interactions.

App Store/Play Store: MyVCA

Halen Super App | Lead Flutter Engineer | March 2023 – May 2023 | Houston,Tx

- Designed and developed the **HALEN SUPER APP** using **Flutter and AWS Amplify**.
- Integrated **AWS authentication and authorization** for secure login and API access.
- Implemented **agile development processes**, including daily stand-ups, backlog grooming, and sprint planning.
- Built interactive UX designs using **Figma** and optimized app usability.
- Keep the entire application aligned with coding standards.
- Implemented **CDN** integration in a Flutter application to optimize image and asset delivery, improving load times by 40%.
- Implemented **Firebase Cloud Messaging (FCM)** for **push notifications** across all app states, ensuring real-time updates and enhanced user engagement.

Dexlock Technologies | Senior Mobile Application Engineer | Nov 2019 – May 2022 | India

- Developed cross-platform mobile applications for **LifeMD** and **Telehealings** using Flutter, optimizing performance, UI, and state management with tools like **Provider** and **GetX** for efficient and scalable solutions.
- Experience in building native android application using Java programming skills using MVC and MVVM architecture.
- Hands on experience in building native android application **Highrich** using **Kotlin(Jetpack Compose, Kotlin Flow, Coroutines)** with **remote data using REST APIs**.
- Integrated **various payment gateways** (Chargify, Razorpay,Apple Pay,Google Pay,Stripe) and **video call SDKs** (Agora, Twilio, Zoom).
- Designed a real-time chat system using **Socket.IO(WebSockets)**, including online status and last-seen tracking.
- Implemented **CI/CD pipelines** using **CodeMagic** for automated builds and deployments.
- Improved test coverage and app reliability through comprehensive unit, widget and integration testing

- Optimized Flutter app performance and implemented advanced analytics by integrating Sentry for real-time error monitoring and Alice for HTTP traffic inspection and debugging.

 **App Store/Play Store: LifeMD, Highrich, Telehealings, Upcomer Esports**

CodeFolks Technologies | Android Developer | Aug 2018 – Nov 2019 | India

- Developed native android applications using **Java (MVVM, MVC, DataBinding)** and **Kotlin** and handled remote data using REST and JSON.
- Integrated **Dependency Injection** and build management using Gradle.
- Implemented **SQLite/MySQL** for offline storage for ensuring efficient data management.
- Utilized **Google** and **Firebase Crashlytics** for App Store optimization(ASO) for app debugging and performance monitoring.
- Hands on experience in wireless communication technologies(**BLE and NFC**).
- Experience with **ADB** commands
- Proficient in writing testable code and implementing automated tests to ensure code quality
- Expertise in optimizing apps for performance, including memory management and responsiveness.
- Implemented **multi-threading** in Android applications using **AsyncTask**, **Handler**, and **Kotlin Coroutines** to ensure smooth UI interactions and efficient background processing.

 **App Store/Play Store:, Doukani, Humfit**

EDUCATION

Bachelor of Technology in Computer Science -India
